

Company Rules and Policies

- **CP-001 — Approved Project Records**

Project information, generated project plans, decisions, and status records must be stored in an approved company system or repository.

- **CP-002 — Project Ownership**

Every project must have an identified project owner or responsible project manager.

• **CP-003 — Decision Recording**

Important decisions affecting project scope, staffing, cost, or delivery should record:

- Decision.
 - Decision maker.
 - Decision date.
 - Affected project.
-

• **CP-004 — Confidential Information**

Confidential company or project information may only be accessible to authorized users.

• **CP-005 — External Vendor Identification**

When a project depends on a third-party vendor or external service, the applicable vendor or service should be identified where known.

• **CP-006 — Vendor Review Requirement**

Third-party access to confidential information or internal company systems must be subject to appropriate company approval.

• **CP-007 — Procurement Requirement**

A project requiring procurement should identify:

- Required product or service.
 - Business justification.
 - Supplier where known.
 - Expected cost where available.
-

• **CP-008 — Mandatory Company Policy**

A company policy identified as mandatory for a project must be treated as a project constraint.

• **CP-009 — Policy Conflict**

A generated project plan must not intentionally conflict with an active mandatory company policy.

- **CP-010 — Policy Version**

Only the active version of a company policy should be used during planning and validation.

- **CP-011 — Superseded Policy**

A superseded policy may remain available for historical purposes but must not be treated as the active planning rule.

- **CP-012 — Policy Exception**

A project requiring an exception to an active mandatory company policy must be flagged for project-manager review.

- **CP-013 — Policy Exception Information**

An approved policy exception should identify:

- Reason.
 - Approver.
 - Affected scope.
 - Review or expiration condition where applicable.
-

- **CP-014 — Policy Traceability**

A company policy materially affecting a task, employee assignment, project phase, or project constraint should be linked to the affected project-plan element.

- **CP-015 — Mandatory Policy Violation**

A generated plan containing an unresolved violation of a mandatory company policy must be marked as requiring review before approval.
